What are managed lanes?
Managed lanes are designated lanes or roadways within highway rights-of-way where the flow of traffic is managed by restricting
- vehicle eligibility,
- limiting facility access, or in some cases
- collecting variably priced tolls.

Managed lanes consist of many different facility types and management strategies:
- High-Occupancy Vehicle (HOV) Lanes
- High-Occupancy Toll (HOT) Lanes
- Managed Access Lanes
- Contraflow Lanes
- Transit-Exclusive Lanes
- Priced Lanes

Managed Lane Committee Meeting
TRB’s Technical Activities Division has over 200 standing committees that sponsor various sessions during the Annual Meeting.
